## Timeless beauty.

There are some things that never go out of style. They are timeless, they are classic.

That is what Haas Door had in mind when we designed our American Tradition Series™ garage doors.

Imagine the beauty of the 1800's carriage house, the tall rooflines, warm gaslights, and the elegant handcrafted wooden doors detailed with wrought iron hardware.

At Haas Door we have taken all the elegance of the original wooden carriage house door and translated it into a beautifully wood grained embossed door. The heart of the American Tradition Series™ has 21st century materials. Combined with modern technology, you have a beautiful garage door that provides a stronger barrier to the elements than wood.

There is beauty, versatility and quality in the products we produce at Haas Door.

## Built to last.

At Haas Door we are proud to showcase beautiful custom garage doors, which simulate wood with the low maintenance of steel. They are insulated to be thermally efficient throughout the year. We offer two top section designs providing a solid wood appearance, as well as your choice of two window option panels to allow for added natural lighting.

Our decorative hardware has the look of forged iron for an added elegant finish.
